EDUCATION

Master of Science in Information Management | University of Illinois Urbana Champaign

Aug 2024 - May 2026

Courses: Data Warehousing & Business Intelligence, Information Management, Information Consulting, Methods of Data Science

Bachelor of Engineering in Computer Science | University of Mumbai

Jun 2019 - May 2023

Courses: DBMS, Big Data Analysis, Data Warehousing and Mining, Project Management, NLP, Machine Learning, Social Media Analytics

SKILLS

Analytical: Data Cleaning, EDA, Statistical Modeling, Predictive Analytics, Machine Learning, ETL Pipelines, Exploratory Data Analysis

Technical: Python, SQL, R, Power BI, Tableau, Excel, FastAPI, Docker, Git, NLP, Apache Kafka, Neo4j, CI/CD Pipelines, Java, C/C++

Libraries / Cloud: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, LightGBM, AWS (S3, EC2, Redshift, EKS), PostgreSQL, GCP BigQuery

Certifications: Google Data Analytics, Certificate of Devtown Internship on MERN stack Training, AWS Fundamentals

WORK EXPERIENCE

Stu/Dio at Illinois

Champaign, IL

Project Manager

Aug 2025 - Present

- Manage a cross-functional team of **6** to deliver new builds and content updates for *DeepCover*, driving **25% user growth** and raising ratings to **4.0 stars** on both the App Store and Play Store through consistent iteration and user-feedback integration
- Implement **Agile** frameworks (**Scrum**, **Kanban**) and **JIRA**-based sprint tracking to optimize collaboration, streamline QA cycles, and ensure on-time milestone delivery for stakeholder-ready game demos

Business Intelligence Group

Champaign, IL

Technical Consultant

Aug 2025 – Dec 2025

- Engineered **Retrieval-Augmented Generation (RAG) pipeline** and Selenium-based **automated crawlers** to extract payer and insurance billing rules from healthcare PDFs and portals, converting them into structured, queryable knowledge base
- Optimized payer rule retrieval and policy tracking, reducing manual lookup time by **60%** and improving billing efficiency for healthcare clients and hospitals through scalable, version-controlled knowledge systems built on **FastAPI**, **PostgreSQL** and **pgVector**

University of Illinois Urbana Champaign

Champaign, IL

Research Assistant | ischool - Finance and Health

May 2025 - Present

- Built cross-platform mHealth app using **Flutter** and **Dart**, enabling real-time integration of wearable fitness data and personalized coaching for **100+** older adult users
- Designed **Postgres** database to store longitudinal activity data, conversational history and user profiles, improving query performance and chatbot context retention by **40%**
- Engineered **AI chatbot** with **Retrieval-Augmented Generation (RAG)** pipeline and history summarization, reducing context loss in multi-turn conversations by **55%**, enhancing user engagement and coaching accuracy

Research Assistant | AI in Infodemic Management (CHI)

Jan 2025 – May 2025

- Spearheaded integration of real-time misinformation detection pipelines using **Apache Kafka** and **Neo4j Streams**, enabling high-throughput data ingestion and improving scalability for identifying viral health misinformation across **TikTok** and **YouTube**
- Architected and automated modular **Python NLP pipelines**, deploying them on **AWS EKS via Docker** to streamline topic classification and reduce model latency by over 40%
- Developed and documented scalable **inference APIs** to serve NLP models, **orchestrating CI/CD workflows** that ensured continuous deployment, reproducibility, and production reliability for WHO-aligned misinformation tracking systems

Swift Mobil Software Solutions Provider

Mumbai, IN

Data Analyst

Jul 2023 - Oct 2023

- Analyzed and transformed large **REST API** datasets using **Python (Pandas, NumPy)** to clean, validate, and prepare data stored in **AWS S3**, improving reporting accuracy by **20%**
- Leveraged **Neo4j** and **SQL**-based queries to identify patterns, dependencies, and anomalies across operational data, driving a **30%** faster **root-cause analysis** for business operations
- **Built and maintained** interactive **Power BI dashboards** visualizing logistics and financial KPIs, reducing manual report preparation time by **40%** and enhancing data-driven decision-making for leadership

Pscope Technologies Pvt. Ltd.

Mumbai, IN

Data Analyst

Jan 2023 - Jun 2023

- Automated **Excel**-based reporting using **VBA** scripts, eliminating repetitive data entry and reducing report preparation time by **30%**, resulting in faster weekly insights delivery
- Designed and maintained over **20 dynamic Power BI dashboards** across Sales, Finance, and Operations, leveraging **SQL** queries and **DAX** to drive cross-departmental data-driven decisions
- Consolidated **CRM** and **ERP** datasets for accuracy validation, collaborating in **Agile sprints via Jira**

PROJECTS

Predictive Credit Limit Adjustment & Customer Segmentation | Python, LightGBM, SQL

UIUC Hackathon

- Designed end-to-end ML pipeline in Python using LightGBM to forecast Q4 spending and recommend personalized credit limit changes; increased precision by 15%
- Participated in QA and data review cycles to support the reliability and clarity of model outputs in research-driven projects
